OBJECTIVE

Motivated and self-driven Computer Science and Engineering graduate with a strong passion for programming, full-stack web development, cloud technologies, and building real-world applications. Experienced in developing projects using modern web technologies and AWS through continuous self-learning, project training, and internships. Skilled in creating innovative solutions, exploring new technologies, and adapting quickly to challenging environments. Eager to contribute to innovative projects, collaborate with dynamic teams, and continuously grow as a software developer while building efficient and scalable solutions.

EDUCATION

KAMARAJ COLLEGE OF ENGINEERING & TECHNOLOGY

Bachelor of Engineering in Computer Science, CGPA: 8.64/10.0

Virudhunagar, Tamil Nadu

April 2026

KSHATRIYA GIRLS HIGHER SECONDARY SCHOOL

Higher Secondary - 89.5% and Secondary Education - 85.2%

Virudhunagar, Tamil Nadu

May 2022 and Mar 2020

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript
- **Database:** MySQL, MongoDB, PostgreSQL
- **Software Development:** HTML, CSS, React.js, Node.js, Express.js, Java servlet, AWS
- **Tools & Platforms:** Linux, shell scripting, Git, GitHub, Postman.

PROJECTS

SECURECLOUD – ENCRYPTED CLOUD FILE STORAGE PLATFORM

- Developed a secure cloud storage web application using React, Express.js, MongoDB, and AWS S3 with JWT authentication, encrypted file uploads, folder management, and secure file preview/download features.
- Implemented end-to-end file encryption using AES-256-GCM, secure password-based key derivation, private S3 storage architecture, and a modern SaaS-style responsive dashboard for secure file management.

VS CODE EXTENSIONS

- **Files to Word** – A custom extension to convert selected files directly into Word format from VS Code. [Link](#)
- **Get File Path** – Instantly gets you the absolute file path with one click, ease workflow efficiency. [Link](#)

TRACK YOUR FINANCE

- Built a personal finance tracker using React and GitHub API for cloud storage, featuring transaction management, budget tracking, and encrypted PIN authentication. [Link](#)
- Developed a responsive web app with features including loan calculator, PDF reports, and real-time multi-device sync, deployed on Netlify. Pin: 2026.

HAPPY TAILS - A PET ADOPTION PLATFORM

- Designed and implemented a web-based platform to help users adopt and rescue pets. [Link](#)
- Built features like pet listing, adoption forms, and admin panel using React, Node.js, and MongoDB.

INTERN EXPERIENCE

ZOHO CORPORATION

Project Trainee

Madurai, Tamil Nadu

Dec 2025 – Jan 2026

- Gained hands-on experience with core features of the Windows operating system including Active Directory, and Win32 API.
- Worked primarily in C++ to interface with low-level Windows system APIs.
- Explored enterprise-grade software tooling and internal product architecture.

PRIGA SOLUTIONS

Full Stack Intern

Virudhunagar, Tamil Nadu

May 2024

- Developed full-stack web modules using the MERN stack (MongoDB, Express, React, Node.js).
- Gained clarity on internal business tools and project management workflows such as Jira.
- Collaborated with the team to design and implement backend REST API routes.

INTERESTS

- Exploring modern full-stack application development integrated with Artificial Intelligence, Machine Learning, and cloud technologies to build smart and scalable solutions.
- Interested in designing efficient backend systems, developing interactive user interfaces, working with modern frameworks, and creating secure, high-performance applications with seamless user experience.

ACHIEVEMENTS

- Selected among the Top 4 Under 30 in Mini Technovision 2025 for presenting my project, HAPPY TAILS.
- Completed NPTEL-certified course: Data Structures and Algorithms using Java.
- 240+ problems solved in Leetcode.
- 185+ problems completed in GFG Practice and ranked 7 in my institution.
